■ **Declaration of non-Russian origin of our purchases of goods**

Jakob AG hereby confirms that we do not source any materials that have been processed and/or manufactured in Russia. We carefully review all material certifications to ensure that the origin of the materials, including molten, rolled and manufactured material, is non-Russian. This declaration is in accordance with the regulation (EU) no. 833/2014.

In the event of a customs inspection or other regulatory requirements, we are able to fully provide the necessary documentation proving the non-Russian origin of the primary products.

This facilitates a standardized import processing for affected products and allows for the direct registration of document coding Y824 on our behalf.

Emanuel Jakob
COO, Jakob Rope Systems
